ABOUT SOCCEREX TRANSFER REVIEW

MISSION

Soccerex Transfer Review by Prime Time Sport provides since 2009 (originally established as Football Transfer Review) relevant data and insightful and independent analysis on the variables that influence squad designs and player transfers at main European Clubs

CONTENT

- 2 releases published every year, related to Summer and Winter transfer windows
- The objective is to combine the available data in a way that helps to come-up with insightful analysis, rather than the publication of the information itself
- Addressed to both football industry professionals and those that follow it with special interest

SPECIFICATIONS

- Data included refer to main divisions of top 5 European leagues (Liga BBVA, Premier League, Lega Calcio, Bundesliga and Ligue 1)
- Transfer data only include fix amounts.
- Year to year comparisons refer to winter market only, unless otherwise indicated
- Includes transfers that took place until January 31st 2014
- Transfer figures are gross of commissions or revenue share with other stake holders
- Sign-up means new player arrivals (not total number of registered players) and Exits players leaving the team (even if on loan)
- “Top European teams”: fix group of teams that according to Prime Time Sport are the most important in Europe (FC Barcelona, Real Madrid, Manchester United, Manchester City, Chelsea, Arsenal, PSG, AC Milan, Inter Milan, Juventus y Bayern Munich).
- On going season review and European Football Table have been produced mainly with 1st half of the season at top 5 European leagues (except where otherwise indicated)
- Neymar move from Santos to FC Barcelona has been kept at 57,1mio€ transfer fee, as officially described by FC Barcelona
- Sales of players (or stakes of economics rights) to investment funds are not considered by the report

TEAM

- Director: Esteve Calzada
- Head of content: Bruno Batlle
- Coordinator: Aleix Piqué
- Analyst: Jaume Majó
- Event hosting: ESADE Business School

BACKGROUND

- ✓ Summer transfer window was the busiest in history, with top 5 European leagues having increase expenditure by 40% to 2,1bio
- ✓ UEFA Financial Fair Play mechanism, which will not allow to participate in European competitions the teams with more than 45mio€ of accumulated losses during 3 seasons until 2014/15, affects transfer decisions and increase revenue generation needs at top European clubs
- ✓ Wide availability in the market of free players as a result of continued reduction of the number of players in the squads
- ✓ New TV contracts in place at English Premier League as of this season increase purchasing capacity of its sides in more than 50%
- ✓ In England, Manchester United tough season on the pitch required action in terms of bringing a world class midfielder
- ✓ Top Premier League have been signing young talent in recent years that need to gain experience in lower profile teams and leagues
- ✓ In Spain, the difficulty to further grow revenues affecting the majority of clubs, along with new regulations imposed by CSD (government sports body) and LFP (Spanish professional league) result in a more strict control of the expenditure in new players

TOTAL INVESTMENT WINTER SIGNINGS- TOP 5 EUROPEAN LEAGUES

Mio€

European teams have invested a total of 290mio€ in player transfers at winter window, down 4,3% vs previous season.

CONCLUSIONS STR 2014- WINTER (1 OF 4)

- ✓ At the second season of the coming into force of UEFA's Financial Fair Play we can not conclude yet it has helped to reduce the gap between richest and poorest clubs

- ✓ European teams have invested a total of 290mio€ in player transfers at winter window, down 4,3% vs previous season. Investment has now been stable for 3 consecutive years. Winter transfer window continues to be a complement to investment taking place in the summer. This January it represented only 13,5% of amount spent in summer 2012

- ✓ Combined investment of summer (the main driver) and winter in top 5 European leagues was in excess of 2,4bio€, up 32% vs last season and record high ever.

- ✓ English Premier League lead once again investment in Europe -52% of the total, the highest ever- followed by French League 1. Spending at Italian Serie A dropped 54% while La Liga continues at the bottom for one more year

- ✓ Investment by Premier League sides was the highest ever and approaches 1bio€, as a result of yet another increase in TV revenues. For second year in a row, Spanish La Liga is the fourth European league in terms of total investment (summer plus winter) in signings

CONCLUSIONS STR 2014- WINTER (2 OF 4)

- ✓ Premier League has the smallest concentration as top 2 teams (Chelsea & Tottenham) account for 28,7% of total and top 4 for 49,8% (+ManCity and ManU). On the opposite side, Ligue 1 (PSG and Monaco make 73,2%) and La Liga (Real Madrid and FCB 61,2%) are the most polarized tournaments
- ✓ Total number of sign-ups in Europe was down 14% to 257. For the 5th season in a row, Italian Serie A registered the highest number of signings (95). Loans and free transfers continue to represent a significant portion of the transactions. For the 5th consecutive season, all leagues have experimented a net decrease in the number of players, as teams are reducing players payroll. Premier League had the highest net decrease, which has been growing for 4 consecutive years
- ✓ Sale of Mata to ManU helped Chelsea top again a spending table after signing Matic, Zouma & Salah, closely followed by ManU. No Spanish nor German teams in the top 10
- ✓ 7 top European teams (AC Milan, Arsenal, Real Madrid, Juventus, ManCity, Bayern and FC Barcelona) did not spent any cash on transfer fees. For ManCity, Bayern and FC Barcelona it was for the 3rd consecutive winter transfer window. Chelsea is the main protagonist of winter window, topping both spending and sales tables. Another Premier League side –Newcastle- and Benfica follow after selling Cabaye and Matic.
- ✓ Besides Chelsea, the only top club with sales activity was FC Barcelona (Sanabria to Italian side Sassuolo).

CONCLUSIONS STR 2014- WINTER (3 OF 4)

- ✓ New signings table was dominated by Serie A sides. Fulham, Cardiff City and Valencia, the only non Italian sides in the top 10 with 7, 6 and 5 new players respectively. On top of Italian sides, Chelsea (13), ManU (12) and Crystal Palace (12) were among the sides releasing the highest number of players in Europa

- ✓ Juan Mata signing by ManU for 45mio€ was the most expensive of the winter, followed by Matic and Cabaye (both 25 mi€). 5 of 10 most expensive moves had Chelsea involved, either selling or buying. Mata, Matic and Cabaye join historical top 10 of most expensive transfers in a winter window, which is still topped by Fernando Torres move to Chelsea for 58,5mio€. 8 out of 10 most expensive winter signings ever, conducted by Premier League sides

- ✓ Real Madrid was the side with highest combined investment (summer + winter) of season 2013/14 with 182mio€, even if not spending in winter, followed by Monaco (178), PSG (136), Chelsea (131) and Tottenham (122). ManCity, Napoli, AS Roma, Dinamo Moscow and Shaktar complete top 10.

CONCLUSIONS STR 2014- WINTER (3 OF 4)

- ✓ La Liga teams invested 12mio€ in new players in January, in line with previous season. The amount is one of the lowest of last 15 seasons and keeps Spanish league at the bottom in Europe. The main portion of investment of the season was conducted in the summer. As a result, investment in January represented only 3% of the summer expenditure at La Liga

- ✓ Driven by the signings of Bale (Real Madrid) and Neymar (FC Barcelona), combined investment (summer+winter) in La Liga grew again and was the second highest of the last 6 years (400mio€, of which 60% by Real and Barça). Even with the impact of winter investment growth, season 2012/13 will have seen a 62% decline (to 140mio€) in La Liga new players total expenditure, the lowest among top European leagues and of the last 5 years

- ✓ Only 5 out of 20 La Liga teams signed players this winter paying a transfer fee. The other 15 teams have not paid any transfer fees for 3 years in a row

- ✓ Atletico Madrid gets confirmed as the driving force of winter transfer window at La Liga, with a total investment of 24mio€ in 5 years. Real Madrid and FC Barcelona rarely make any investments in January

CONCLUSIONS STR 2014- WINTER (4 OF 4)

- ✓ Canales (Real Sociedad; 3,5mio€) and Araujo (Valencia; 3,5mio€) were the most expensive signings at la Liga transfer window. Top 10 most ranking of most expensive winter signings ever remains unchanged for second year in a row

- ✓ La Liga sides collected 10,6mio€ from player sales in January, offsetting most of the expenditure and resulting in just 1mio€ of net investment. FC Barcelona topped the list of revenues from players transfers after selling youngster Toni Sanabria to Sassuolo for 4,5mio€. Valencia (3,5mio€) and Villarreal (2,5) were the only other sides that collected money from player sales

- ✓ A total of 38 players were signed by La Liga sides in January, down from 44 last season. Loans and free transfers are still very popular and represented almost half of the moves. Just like it happened at the other top European leagues, La Liga teams took advantage of winter transfer window to reduce the number of players in their squads

- ✓ Valencia was the most active La Liga team in January, bringing 5 new players and releasing 6. Real Madrid, FC Barcelona, Sevilla, Espanyol and Ath Bilbao did not sign any new players. Sevilla was the team that most reduced players in squad, by releasing 7 players and not bringing anyone. Neither Real Madrid nor FC Barcelona released any first squad players

SUMMARY: ON GOING SEASON REVIEW

- ✓ Participation of players signed last summer has grown 3% to 42%. New players having participated in more than half of total minutes has never reached 50%. FC Barcelona (Neymar), Celta, Osasuna and Getafe are the teams that have taken best advantage of summer player signings. On the other extreme, Betis, Espanyol, Atlético and Real Sociedad

- ✓ Fernandinho has become the most profitable player from top 10 most expensive of last summer. Higüain and Özil also among most profitable. On the opposite side, Willian and Illarramendi. Despite not being yet among undisputable first eleven in their team, Isco and Neymar played 70% and 65% of minutes respectively. Atlético signings virtually not used

- ✓ Musacchio, Gaspar and Trujillo (Almería) are the only La Liga players that played 100% of the minutes. Respective injuries provoked that for the first time neither Cristiano Ronaldo nor Messi are among the most used players of La Liga

- ✓ Atlético de Madrid is the team with most stable line-up: 9 of its players have participated in more than 70% of the minutes (on the other side Valencia and Betis with just 4). Real Madrid and FC Barcelona have 7 and 6 key players respectively (same as last season)

SUMMARY: ON GOING SEASON REVIEW

- ✓ Betis from Sevilla is for 3rd consecutive year the team that has fielded most different players so far (27). On the other side, Celta fielded 20 different players only. Athletic de Bilbao (20) is well ahead in terms of usage of home grown players. Real Sociedad (16) and FC Barcelona a (15) complete top 3 positions for the third year in a row. On the other side, Granada did not field any home grown player for 2 consecutive seasons

- ✓ Betis from Sevilla is for 3rd consecutive year the team that has fielded most different players so far (27). On the other side, Celta fielded 20 different players only

- ✓ Athletic de Bilbao (18) is again ahead in terms of usage of home grown players. Real Sociedad (17) and FC Barcelona a (16) complete top 3 positions for the third year in a row. On the other side, Granada and Getafe have only used 2 and 1 respectively

- ✓ FC Barcelona is again well ahead other European teams in terms of home grown players utilization (among those in the top 3 positions of their leagues). Real Madrid reaches top 3 with 8 home grown players used (7 at 12/13 and 4 at 11/12)

SUMMARY- EUROPEAN FOOTBALL TABLE 2013/14

- ✓ Guardiola's Bayern Munich tops European Football Table for the first time, having achieved 92,2% of total points possible (82,4% last year). Juventus achieved the best rate of an Italian team in recent years with 91,2% of the point (vs 77,2% last year). Arsenal is the only Premiership team in top 10 as a result of one of most competitive seasons in England.

- ✓ Socheaux (Ligue 1), Betis (La Liga) and Ajaccio (Ligue 1) are the worst teams in Europe

- ✓ FC Barcelona, Manchester City, Bayern Munich and Juventus are the only teams that have won all home games. Bayern Munich and Juventus are also the best teams playing away, with 83,3% points rate during first half of the league

- ✓ Manchester City is top scoring side in Europe, with an average of 2,84 goals per game, just ahead of Real Madrid and FC Barcelona (2,79). The Citizens home average is even better with 3,80 goals per game, the highest in recent years

- ✓ Lille has the best defense in Europe, having conceded an average of just 0,42 goals per game, followed by Bayern Munich and AS Roma

SUMMARY- EUROPEAN FOOTBALL TABLE 2013/14

- ✓ FC Barcelona has the highest favorable goal difference in Europe (+41), followed by Atlético (+36) and Bayern Munich (+35)

- ✓ Lille (1,82 points per goal in average), Tottenham (1,55) and Crystal Palace (1,33) are the teams with best goal profitability in Europe

- ✓ La Liga BBVA has increased the average goals per game for the 3rd year in a row (2,61 in 2011/12, 2,85 in 2012/13 and 2,91 in 2013/14)

- ✓ German Bundesliga is the most prolific European league for 4th consecutive season, with record high 3,2 goals per match in average. La Liga maintains second position (2,91) and Premier League has fallen to 4th position for the 1st time (2,68 goals per match, -5% vs previous season)

- ✓ Investment in new players brought better pitch performance, as 8 of the top 10 spending sides of the summer in Spain have improved their points rate. Real Madrid shows the best improvement while FC Barcelona and Betis fail to capitalise the expenditure in new players last summer getting a lower percentage of points than last year

SUMMARY- EUROPEAN FOOTBALL TABLE 2013/14

- ✓ Cristiano Ronaldo is the best striker in Europe with 20 goals, followed by Diego Costa and Luis Suárez (19 each). The Uruguayan achieved the best goals efficacy in Europe by scoring a goal every 66 minutes, close to record rate by Messi at season 2012/13 (scoring every 59 minutes)
-
- ✓ Cesc Fàbregas is the best in Europe in terms of assists, with 10 in total, ahead of Atlético's Koke (9), Wayne Rooney (8) and Neymar (8)
